# Woodford Resources: Land, Water and Air

Versailles • Midway • Woodford County Planning Commission

## Special points of interest:

- This is the fifth update in the history of planning in Woodford County (1969, 1977, 1989, 1997 and now).
- Woodford County lies in the Watershed of the Kentucky River
- Much of Woodford County is susceptible to the formation of sink-holes.
- Woodford has good air quality, but will need to cooperate with its neighbors to maintain that quality.

## Background Study and Plan Element for the 2005 Comprehensive Plan Update

## Inside this Report

Chapter 1: Land Resources	3
Chapter 2: Water Resources	16
Chapter 3: Air Resources	29
Chapter 4: Trends and Issues That Influence the Goal Setting Process	33

Chapter 6: A Plan for Preserving Woodford Resources	43

A copy of this report (in PDF format), or any other Background Report can be downloaded from [woodfordcountyplanningandzoning.com](http://woodfordcountyplanningandzoning.com).

## The Update Process

This Report is one of six Background Studies/Plan Elements prepared for the Comprehensive Plan Update. Other studies include: People, Jobs and Housing; Regional Coordination; Mobility; Community Facilities and Services; and The Use of Woodford Land.

The Chapters of this Report

provide background information on land, water and air resources within the County.

In addition, Goals and Objectives adopted by the Planning Commission and legislative bodies are included. These statements provide the basis for the remainder of the document which constitute the

“plans for preservation and enhancement of Woodford’s resources.

The goals and plans contained herein represent the hard work and expectations of a great number of Woodford residents.
