The Update Process

The 2005 Comprehensive Plan Update represents the culmination of a two plus year process undertaken by the Versailles, Midway and Woodford County Planning Commission.

In Kentucky, state planning legislation requires that Comprehensive Plans be updated every five years. This update supersedes the 1997 Plan Up-

date, providing updated Goals and Objectives and six Plan Elements that include: People, Jobs and Housing; Regional Coordination; Mobility; Woodford Resources; Use of Woodford Lands; and Community Facilities and Services.

This first part of the Comprehensive Plan Update is called a Working Summary because it

contains the goals, objectives, policies, guidelines and implementation actions that the Planning Commission, Legislative Bodies and others are most likely to use on a regular basis

The reader should be aware that the Plan Elements provide additional context for interpretation of these "working" components of the Plan.
